### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- ☐ Notice of Informal Patent Application (PTO-152)
- ☐ Other: \_\_\_\_\_.

***Double Patenting***

1. Claims 20-28 are objected to under 37 CFR 1.75 as being a substantial duplicate of claims 1-9. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

***Allowable Subject Matter***

2. Claims 1-19 are allowed over prior art.

3. The following is a statement of reasons for the indication of allowable subject matter:

Although the combined prior art teaches configuring a switch in a communication system that implements generating rate control messaging to reflect data packet rate in a packet switching system, they fail to teach or suggest a first switch and second switch associated with separate numbering scheme for designating a first group and second group of ports, and configuring a first port to generate a first MAC control frame based on a first rate control message, and switch a first MAC control frame to a second port, configure a second port to extract first rate control message from MAC control frame, and configure a second switch to generate a second rate control message based on a first rate control message, different from first rate control message to prevent back pressure related to a second port.

***Conclusion***

4. This application is in condition for allowance except for the following formal matters:

There exist a double patenting issue, wherein there are duplicate claims in pending present Application.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
